102 LARYNGOSCOPE CATALOGUE

AUG MEDICAL

Quality. Defined

QUALITY WITH EXCELLENCE

AUG Medical is an accredited manufacturer of high-quality laryngoscopes, diagnostics, airway management devices, video laryngoscopes and otoscopes.

We are a direct supplier and distributor of medical equipment with regional hubs in the United Arab Emirates, the United States, Poland and Hong Kong. Our UAE hub serves the Middle East and Africa, the United States covers North and South America, Poland serves Europe and Hong Kong serves Asia Pacific. Our goal is to provide our customers with certified, standardised products of premium quality at competitive prices, backed by maintained stock for fast and efficient delivery.

Responsive customer service is very important to us. Our team answers questions and resolves concerns in several languages, in your time zone. Hospitals, clinics, ambulance services and distributors in more than 45 markets work with AUG, and every order comes with the documentation procurement teams need. We constantly improve our range to give our customers access to the best products.

The confidence placed in our brand and the satisfaction of our customers are the result of effective quality management and internal audits under ISO 9001 and ISO 13485. Our devices carry the CE mark and are FDA listed, and our production is GMP-controlled.

Thank you for choosing AUG MEDICAL.

LARYNGOSCOPY

INTENDED USE

The rigid laryngoscope is a device used to examine and visualize patient's airway and aid placement of tracheal tube. Laryngoscope is an examination device that lets your diagnostician look at the back of your throat, your voice box (larynx) and vocal cords with a scope (laryngoscope). There are two types of laryngoscopes, and each uses as different equipment, namely direct & indirect laryngoscope.

INDIRECT LARYNGOSCOPE

Indirect laryngoscope are used by diagnostician in clinics with mouth mirror and handle to view throat / larynx.
The diagnostician uses an external headlight to transmit illumination into patient's mouth for examination.
Some diagnostician uses pen torch as well. Indirect laryngoscope is not done as much now because flexible laryngoscopes let your diagnostician see better and are more comfortable for you.

DIRECT (FLEXIBLE OR RIGID) LARYNGOSCOPE

Direct laryngoscope lets your diagnostician to see deeper into your throat / larynx. The scope is either flexible or rigid. Flexible scopes such as FLEX-TIP helps in difficult intubation and are more comfortable for patient and it user. Rigid scopes are often used in standard intubation process.

WE CHOSE HIGH-END CERTIFIED RAW MATERIALS

Medical Devices such as non-sterile, laryngoscopes, supplied by AUG Medical are comprising Stainless Steel (AISI 304) and Brass. We buy such materials from approved suppliers to maintain our quality and standards.

ESSENTIAL PERFORMANCE

The Laryngoscope should be well illuminate the area under examination in order to get perfectly diagnose, otherwise incorrect information could lead to an inappropriate treatment that would present an unacceptable risk to the patient.

WARRANTY

Instead of the usual 2-year guarantee, we offers guarantee of each device for 5 years from the date of delivery from our factory (this excludes consumables such as bulbs, batteries and packaging). We guarantee the proper function of the unit provided it is used as intended by the manufacturer and according to the instructions for use. Any faults or defects which occur during the guarantee period will be repaired free of charge provided they are caused by faults in material, design or workmanship. In the case of a complaint of a defect in the product during the guarantee period, the buyer must prove that any such defect was present at the time the product was delivered. The usual legal guarantee and warranty do not apply to incorrect use, the use of non-original AUG parts or accessories. (Especially bulbs, as these are designed with emphasis on the following criteria: Color temperature, life expectancy, safety, optical quality and performance.) Also excluded are repairs or modifications made by persons not authorized by AUG or cases where the customer does not follow the instructions supplied with the product. Further claims, in particular claims for damage not directly related to the AUG product, are excluded. For repairs, please contact your distributor, who will return the goods to us or our authorized agent.

EASY TO USE

DELINEATION OF LITERAY® SERIES

On intubation the lighting conditions are bad which results injuries so AUG comes forward to facilitate the users of Laryngoscope by introducing LITERAY® F.O Laryngoscope Handle which are designed to allow even simpler, faster and safer hygienic reprocessing of the handle has no complex disassembling and assembling of batteries and light unit i.e lamp. This saves the technical service personnel with a great deal of time, and reduces the training and maintenance effort.

LITERAY® | F.O LARYNGOSCOPE LED^{HP} HANDLE

LITERAY® F.O LED^{HP} Laryngoscope Handle are designed to allow even simpler, faster and safer hygienic reprocessing of the handle has no complex disassembling and assembling of batteries and light unit. This saves the technical service personnel with a great deal of time, and reduces the training and maintenance effort.

FEATURES

- 2.5V LED^{HP} is constructed with advance German technology.
- Polished metal cap around Lamp gives maximum supply of illumination.
- Lamp can be easily supersede with help of fingers.
- 50,000+ hours life of LED^{HP} Lamp.
- More than 130,000 Lux.
- Knurled handle design provides excellent grip
- Closed battery cover prevent liquids penetration inside the battery compartment.
- Can be easily operated with 2 x C size dry cell batteries.
- Green color coding indicate universal fitting & standard of ISO 7376/3.
- Build in Brass.
- Premium chrome plating finishing.

LITERAY® | F.O LARYNGOSCOPE XENON HANDLE

LITERAY® Xenon Laryngoscope Handle are designed to allow even simpler, faster and safer hygienic reprocessing of the handle has no complex disassembling and assembling of batteries and light unit. This saves the technical service personnel with a great deal of time, and reduces the training and maintenance effort.

FEATURES

- 2.5V Xenon is constructed with advance German technology.
- Polished metal cap around Lamp gives maximum supply of illumination.
- Lamp can be easily supersede with help of fingers.
- 50+ hours life of Xenon Lamp.
- More than 11,000 Lux.
- Knurled handle design provides excellent grip.
- Closed battery cover prevent liquids penetration inside the battery compartment.
- Can be easily operated with 2 x C size dry cell batteries.
- Green color coding indicate universal fitting & standard of ISO 7376/3.
- Build in Brass.
- Premium chrome plating finishing.

LITERAY® | F.O RC LARYNGOSCOPE HANDLE

LITERAY F.O LED/Xenon Rechargeable Laryngoscope Handles are designed to allow even simpler, faster and safer hygienic reprocessing of the handle has no complex disassembling and assembling of batteries and light unit. This saves the technical service personnel with a great deal of time, and reduces the training and maintenance effort. Handle comes with 3.5V Ni-MH 1000mAh rechargeable battery, can be recharge with AUG® Pro Charger.

FEATURES

- 2.5V/3.5V High Power LED/Xenon is constructed with advance German technology.
- Polished metal cap around Lamp gives maximum supply of illumination.
- Lamp can be easily supersede with help of fingers.
- 50,000 hour life of LED.
- More than 130,000 Lux.
- Grooved handle design provides excellent grip.
- Closed battery cover prevent liquids penetration inside the battery compartment.
- Can be easily operated with 3.5V Ni-MH 1000mAh rechargeable battery.
- Also available in 2.5V Ni-MH 700mAh rechargeable battery.
- 2 hour charge gives more than 3 hours working capacity with 3.5V Ni-MH 1000mAh rechargeable battery.
- Green color coding indicate universal fitting & standard of ISO 7376/3.
- Build in Brass.
- Premium chrome plating finishing.

EASY TO USE

DELINEATION OF MAXXLITE® SERIES

AUG MAXXLITE® Series are designed with enclosed fiber optic bundle with a whole new experience. These blades has no cavities to trap dirt or body fluids thus allowing the blade to be easily cleaned or easy autoclave for more then 4000 times. This contributes mostly to the elimination of cross-infection. MAXXLITE® Series delivers the best of it with low friction with smooth-line chrome plating finish and ultra fine smooth edges. MAXXLITE® Series bring a vast range of blades such as;

- **MACINTOSH**
- **MILLER**
- **FOREGGER**
- **FLEXI-TIP**
- **POLIO**
- **PAEDIATRIC**

AUG MAXXLITE® Series are build with prime quality German made fiber. Each blade has more then 8000 strands with dia of 4.5mm, which delivers matchless illumination and bright shine intensity. The fiber is supremely polished from both ends to make if more clear.

MACINTOSH

Our Macintosh Blades are simply designed for daily basis clinical diagnose which help to elevate the epiglottis and to expose the laryngeal inlet, effortlessly.

MILLER

Our Miller Blades are designed with smooth straight flange which helps to obtain a perfect view of the vocal cords by directly lifting the epiglottis or to expose the laryngeal inlet, effortlessly.

FOREGGER

Our FOREGGER/WISCONSIN Blades are specially designed with slightly expanded distal portion which helps better to lift epiglottis.

FLEXI-TIP

Our FLEXI-TIP Blades are designed with finest quality tilts tips with adjustment angle of 90° by pushing out the lever at back, the blades are most demanded for difficult intubation.

POLIO

Our POLIO Blades are designed with a special angle of 130° to facilitate intubation in patients encased within iron lung ventilators during the polio epidemic. This special blade is also useful for patients with barrel chest, restricted neck mobility or breast hypertrophy.

PAEDIATRIC

Paediatric blades are specifically designed for the intubation of neonates and infants, the blade goes straight with a slight curve at it's distal which gives more significant result then other blade for children.

MAXXLITE® | F.O MACINTOSH BLADE

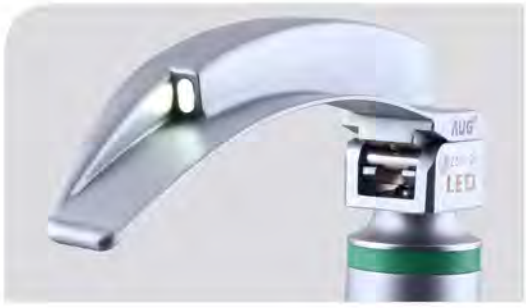

AUG MAXXLITE® Series are designed with enclosed fiber optic bundle. It has no cavities to trap dirt or body fluids thus allowing the blade to be easily cleaned. This contributes mostly to the elimination of cross-infection. It has low friction with smooth-line chrome plating finish.

FEATURES

- Enclosed fiber optic core with 4.5mm diameter.
- 8000 plus fiber strands.
- High quality fibers ensuring brilliant light transmission.
- No sharp edges. Low profile curved blades.
- Maintenance free.
- Autoclave able upto 134 °C approximately 4000 times.
- No adverse effect in using ETO, steam autoclaving or by soaking in Sparax or Cidex.
- In accordance with ISO 7376/3.
- Elegant design with low profile heel.
- Chrome plated.

70.100.404	4	155 x 18
70.100.405	5	176 x 20

FEATURES

- Enclosed fiber optic core with 4.5mm diameter.
- 8000 plus fiber strands.
- High quality fibers ensuring brilliant light transmission.
- No sharp edges. Low profile curved blades.
- Maintenance free.
- Autoclave able upto 134 °C approximately 4000 times.
- No adverse effect in using ETO, steam autoclaving or by soaking in Sparax or Cidex.
- In accordance with ISO 7376/3.
- Elegant design with low profile heel.
- Chrome plated.

MAXXLITE® | F.O LARYNGOSCOPE SETS
MACINTOSH BLADE WITH HANDLE

AUG MAXXLITE® sets are designed with enclosed fiber optic bundle. It has no cavities to trap dirt or body fluids thus allowing the blade to be easily cleaned. Set comes with variations in blades size as well as with different illuminations, i.e LED and Xenon. LITERAY® handle's comes with textured surface for secure grip. Constructed with brass and has endless finish of chromium plating, it also has German illumination technology.

FEATURES

- Enclosed fiber optic core with 4.5mm diameter.
- 8000 plus fiber strands.
- High quality fibers ensuring brilliant light transmission.
- No adverse effect in using ETO, steam autoclaving or by soaking in Sparax or Cidex.
- 2.5V Xenon & LED lamp is constructed with advance German technology.
- Lamp can be easily supersede with help of fingers.
- 50000+ hours life of LED & 10+ hours of Xenon.
- More than 100,000+ Lux with LED & 11000 Lux with Xenon.
- Grooved & Knurled handle design provides excellent grip.
- Can be easily operated with 2 x (AA or C) size dry cell batteries
- Premium chrome plating finishing.
- No sharp edges. Low profile curved blades.
- Maintenance free.
- Autoclave able upto 134 °C approximately 4000 times.
- Green color coding indicate universal fitting & standard of ISO 7376/3.

DELINEATION OF EASLITE® & EXLITE® SERIES

AUG EASLITE® & EXLITE® Series are designed with easy exchangeable fiber optic light guide with a whole new experience. These blades has low profile with cost effective features and are simply autoclaveable for more then 4000 times at specific tempurature. This contributes mostly to the elimination of cross-infection. AUG EASLITE® & EXLITE® Series delivers the best of it with low friction with fine-line satin finish and ultra fine smooth edges. AUG EASLITE® & EXLITE® Series bring an extensive range of blades which are listed below. AUG EASLITE® & EXLITE® Series are build with prime quality German made fiber. Each blade has more then 6500 strands with dia of 4.0mm, which delivers matchless illumination and bright shine intensity. The fiber light guide is supremely polished from both ends to make if more clear.

MACINTOSH

Our Macintosh Blades are simply designed for daily basis clinical diagnose which help to elevate the epiglottis and to expose the laryngeal inlet, effortlessly.

MILLER

Our Miller Blades are designed with smooth straight flange which helps to obtain a perfect view of the vocal cords by directly lifting the epiglottis or to expose the laryngeal inlet, effortlessly.

FOREGGER

Our FOREGGER/WISCONSIN Blades are specially designed with slightly expanded distal portion which helps better to lift epiglottis.

MRI MACINTOSH / MILLER

AUG® MRI Laryngoscope Blades have been developed through extensive research into the requirements of both diagnostic and interventional Magnetic Resonance (MR) intubation. Clinicians can intubate in the MR environment safe in the knowledge that the AUG® MRI Range has been independently tested and certified to be MR-Conditional in a static magnetic field of 3.0 tesla or less, and a highest spatial gradient field of 720 gauss/cm or less.

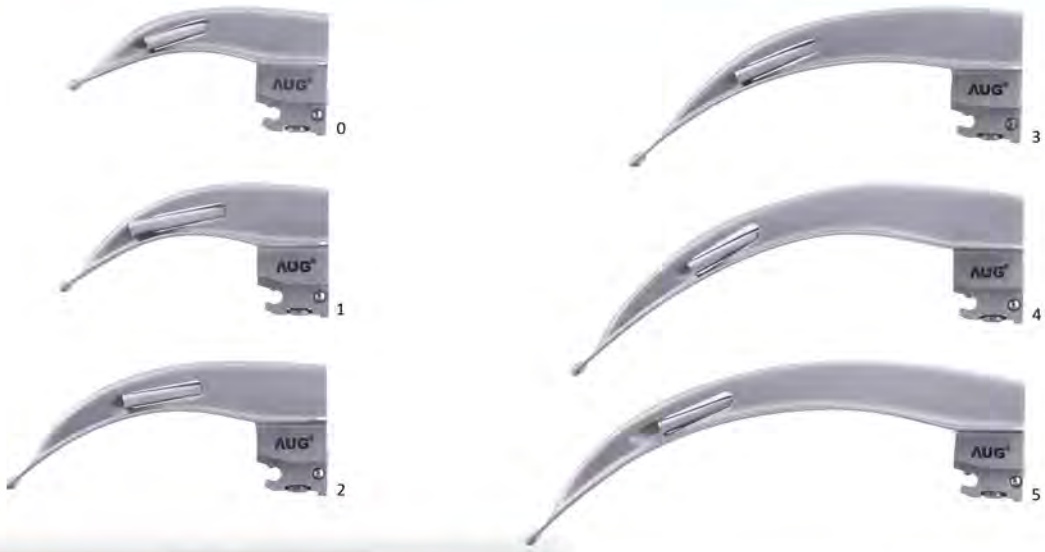

POLIO

Our POLIO Blades are designed with a special angle of 130° to facilitate intubation in patients encased within iron lung ventilators during the polio epidemic. This special blade is also useful for patients with barrel chest, restricted neck mobility or breast hypertrophy.

IV MACINTOSH

IV Blades are specifically designed with extends from heel to mid-blade for improved visualization of the cords, it is also beneficial to guide endotracheal tube insertion Softly. The blade gives more satisfying results because of it's matte finish which virtually eliminates reflection and glare.

We have prescribed important categories, rest details are mentions on there specified pages.

EASLITE® | F.O MACINTOSH BLADE

AUG EASLITE® Series are modern blades and designed with an exchangeable fiber optic light guide. Premium interchangeable light guide systems can be easily disassemble with the help of thumb. Modern exchangeable tube function is easy to replace for autoclaving.

FEATURES

- Replaceable light guide.
- 4.00 diameter fiber optic bundle.
- 5500 plus fiber strands.
- High quality fibers ensuring brilliant light transmission.
- 4200 lux with 2.5V Xenon/Halogen bulb.
- 12500 lux with3.5V Xenon/Halogen bulb.
- No sharp edges. Curved blades.
- Maintenance free.
- Autoclavable upto 134 C approximately 4000 times.
- No adverse effect in using ETO, steam autoclaving.
- In accordance with ISO 7376/3.

EXLITE® | F.O POLIO BLADES

AUG EXLITE® Series blade's are designed with an exchangeable fiber optic light guide having low profile, soft & gentle curvature with the flange starting from the heel and continuing to the tip to its narrows

FEATURES

- Replaceable light guide
- 5500 fiber stands.
- 130° Angled / 110° Angled.
- 4.0mm diameter fiber optic bundle.
- High quality fiber ensuring brilliant light transmission.
- 4200 lux with 2.5V Xenon/Halogen bulb.
- 12500 lux with3.5V Xenon/Halogen bulb.
- No sharp edges. Low profile curved blades.
- Free maintenance.
- Autoclavable upto 134 °C approximately 4000 times.
- No adverse effect in using ETO, steam autoclaving or by soaking in Sparax or Cidex.
- In accordance with ISO 7376/3.

EASY TO USE

EXLITE® | F.O IV MACINTOSH BLADE

EXLITE® IV Macintosh blade is Ideal to use on patients with anatomical variations which make intubation with standard blades difficult or impossible. The basic portions of the blade make an angle of facing spatula for better visualization during intubation, Special extends from heel to mid-blade for improved visualization of the cords. Blade design helps guide endotracheal tube insertion. Soft, matte finish virtually eliminates reflection and glare.

FEATURES

- Replaceable light guide.
- Specially angled blade.
- 4.00 diameter fiber optic bundle.
- 5500 plus fiber strands.
- High quality fiber ensuring brilliant light transmission.
- 4200 lux with 2.5V Xenon/Halogen bulb.
- 12500 lux with3.5V Xenon/Halogen bulb.
- No sharp edges. Curved blades.
- Free maintenance.
- Autoclavable up to 134°C approximately 4000 times.
- No adverse effect in using ETO, steam autoclaving.
- In accordance with ISO 7376/3.

3.0 TESLA MR CONDITIONAL

EXLITE® | F.O MRI MACINTOSH BLADE

AUG® has presented a solution for safe intubations within the magnetic resonance (MR) environment, EXLITE® MRI Conditional laryngoscopes blades are specially manufactured with nonferrous stainless steel for MR Suite safety, durability and long life. Each blade is satin finished to reduce glare and enhance ease of intubation. Exchangeable Fiber Optic ligth guide delivers superior illumination for safer intubations. Field Strengths up to 3.0 Tesla - Tested to comply with ASTM Standards for "MR Conditional" devices in up to a 3.0 Tesla environments.

FEATURES

- Gold plated replaceable light guide.
- 4.00 diameter fiber optic bundle.
- 5500 plus fiber strands.
- High quality fiber ensuring brilliant light transmission.
- 4200 lux with 2.5V Xenon/Halogen bulb.
- 12500 lux with3.5V Xenon/Halogen bulb.
- No sharp edges. Curved blades.
- Maintenance free.
- Autoclavable up to 134°C approximately 4000 times.
- No adverse effect in using ETO, steam autoclaving.
- Yellow color block indicates that the blade is MR conditional.
- Certified to strength the 3.0 Tesla as marked on blade.
- Green color coding indicate universal fitting & standard of ISO 7376/3.

EXLITE® | F.O LARYNGOSCOPE SETS
MACINTOSH BLADE WITH HANDLE

AUG EXLITE® sets are designed with soft, gentle curvature and flange starting at from heel of blade continuing to the tip at its narrows. Set comes with variations in blades size as well as with different illuminations, i.e LED and Xenon. LITERAY® handle comes with textured surface for secure grip. Constructed with brass and has endless finish of chromium plating, it also has German illumination technology.

FEATURES

- Replaceable fiber optic light guide with 4mm diameter.
- 5500 plus fiber strands.
- High quality fibers ensuring brilliant light transmission.
- No adverse effect in using ETO, steam autoclaving or by soaking in Sparax or Cidex.
- 22.5V Xenon & LED lamp is constructed with advance German technology.
- Lamp can be easily supersede with help of fingers.
- 50000+ hours life of LED & 10+ hours of Xenon.
- More than 100,000+ Lux with LED & 11000 Lux with Xenon.
- Grooved & Knurled handle design provides excellent grip.
- Can be easily operated with 2 x (AA or C) size dry cell batteries
- Premium chrome plating finishing.
- No sharp edges. Low profile curved blades.
- Maintenance free.
- Autoclave able upto 134 °C approximately 4000 times.
- Green color coding indicate universal fitting & standard of ISO 7376/3.

READY TO USE

DELINEATION OF D'LITE® SERIES

AUG DLITE® Series are designed supreme quality light guide with a whole new experience. These blades has low profile with cost effective features and are simply stuning for daily basis diagnos. This contributes mostly to the elimination of cross-infection. AUG DLITE® Series delivers the best of it with low friction performance with fine-line satin finish and ultra fine smooth edges, which gives a feel of reusable laryngoscope blades. AUG DLITE® Series bring an smart range of blades which are listed below. AUG D'LITE® Series are build with supreme quality AISI 304 stainless steel. Each blade has ultra fine polished acrylic light guide, which delivers matchless illumination and bright shine intensity. The light guide is covered from back ends to make the intubations ease.

- **MACINTOSH**
- **MILLER**
- **FLEXI-TIP**
- **MRI MACINTOSH**

MACINTOSH

Our Macintosh Blades are simply designed for daily basis clinical diagnose which help to elevate the epiglottis and to expose the laryngeal inlet, effortlessly.

MILLER

Our Miller Blades are designed with smooth straight flange which helps to obtain a perfect view of the vocal cords by directly lifting the epiglottis or to expose the laryngeal inlet, effortlessly.

FLEXI-TIP

Our FLEXI-TIP Blades are designed with finest quality tilts tips with adjustment angle of 90° by pushing out the lever at back, the blades are most demanded for difficult intubation.

MRI MACINTOSH

AUG® MRI Laryngoscope Blades have been developed through extensive research into the requirements of both diagnostic and interventional Magnetic Resonance (MR) intubation. Clinicians can intubate in the MR environment safe in the knowledge that the AUG® MRI Range has been independently tested and certified to be MR-Conditional in a static magnetic field of 3.0 tesla or less, and a highest spatial gradient field of 720 gauss/cm or less.

NON STERILE

DLITE® | F.O SINGLE USE MACINTOSH BLADE

AUG DLITE® laryngoscopes are the most reliable and admired due to its high level of clinical performance. AUG® is offering an extensive range of single use laryngoscopes with all exceptional specifications including a soft and gentle curvature, Green plastic heel gives secure fitting and supreme strength while intubation. It also eliminates the risk of cross infection. Blade shapes optimized to ease the passage of the tube and patient-friendly.It also gives highest level of illuminance with LITERAY® laryngoscope handles.

FEATURES

- Suitable for everyday hospital use.
- Rigid metal spatula looks and feels like a reusable fiber optic blade.
- Build with AISI 304 stainless steel.
- Highly polished Acrylic gives brilliant light transmission.
- Maximum covered outlet point of acrylic.
- No back reflection.
- Green Plastic heel gives strongest strength.
- Single use & CE logos are clearly marked on blades.
- 2 metal ball bearings for secure fittings.
- Supplied in Box of 20 pieces.
- Certified bar coded labels are pasted.
- Available in Sterile with Ty-vek packaging.
- In accordance with ISO7376/3.

DLITE® | F.O SINGLE USE MILLER BLADE

AUG DLITE® laryngoscopes are the most reliable and admired due to its high level of clinical performance. AUG® is offering an extensive range of single use laryngoscopes with all exceptional specifications including a soft and gentle curvature, Green plastic heel gives secure fitting and supreme strength while intubation. It also eliminates the risk of cross infection. Blade shapes optimized to ease the passage of the tube and patient-friendly.It also gives highest level of illuminance with LITERAY® laryngoscope handles.

FEATURES

- Suitable for everyday hospital use.
- Rigid metal spatula looks and feels like a reusable fiber optic blade.
- Build with AISI 304 stainless steel.
- Highly polished Acrylic gives brilliant light transmission.
- Maximum covered outlet point of acrylic.
- No back reflection.
- Green Plastic heel gives strongest strength.
- Single use & CE logos are clearly marked on blades.
- 2 metal ball bearings for secure fittings.
- Supplied in Box of 20 pieces.
- Certified bar coded labels are pasted.
- Available in Sterile with Ty-vek packaging.
- In accordance with ISO7376/3.

MACINTOSH

Our Macintosh Blades are simply designed for daily basis clinical diagnose which help to elevate the epiglottis and to expose the laryngeal inlet, effortlessly.

MILLER

Our Miller Blades are designed with smooth straight flange which helps to obtain a perfect view of the vocal cords by directly lifting the epiglottis or to expose the laryngeal inlet, effortlessly.

FOREGGER

Our FOREGGER/WISCONSIN Blades are specially designed with slightly expanded distal portion which helps better to lift epiglottis.

FLEXI-TIP

Our FLEXI-TIP Blades are designed with finest quality tilts tips with adjustment angle of 90° by pushing out the lever at back, the blades are most demanded for difficult intubation.

POLIO

Our POLIO Blades are designed with a special angle of 130° to facilitate intubation in patients encased within iron lung ventilators during the polio epidemic. This special blade is also useful for patients with barrel chest, restricted neck mobility or breast hypertrophy.

IV MACINTOSH

IV Blades are specifically designed with extends from heel to mid-blade for improved visualization of the cords, it is also beneficial to guide endotracheal tube insertion Softly. The blade gives more satisfying results because of it's matte finish which virtually eliminates reflection and glare.

We have prescribed important categories, rest details are mentions on there specified pages.

WARMLITE® LEDLITE® | C MACINTOSH BLADE

AUG WARMLITE® & LEDLITE® English profile blades are designed with a soft, gentle curvature and a flange starting at the heal of blade and continuing to the tip at its narrows.

FEATURES

- 2.5V LED/Vacuum bulb can be easily replaced.
- Autoclavable upto 134 °C approximately 4000 times.
- No adverse effect in using ETO, steam autoclaving.
- Round edges prevent from injury risk.
- Compatible with ISO 7376/1 standard handles.
- Matt finished to reduce glare.

WARMLITE® LEDLITE® | C IV MACINTOSH BLADE

AUG WARMLITE® & LEDLITE® IV Blades are specially designed for ideal use on patients with anatomical variations which make intubation with standard blades difficult or impossible. The basic portions of the blade make an angle of facing spatula for better visualization during intubation, Special extends from heel to mid-blade for improved visualization of the cords. Blade design helps guide endotracheal tube insertion. Soft, matte finish virtually eliminates reflection and glare.

FEATURES

- Replaceable LED/Vacuum Lamp.
- Specially angled blade
- 2.5V German LED/Vacuum Lamp.
- No sharp edges. Curved blades.
- Maintenance free.
- Autoclavable up to 134°C approximately 4000 times.
- No adverse effect in using ETO, steam autoclaving.
- In accordance with ISO 7376/1.

DIGISKOP® | VIDEO LARYNGOSCOPE KIT
REUSABLE - VLR 100

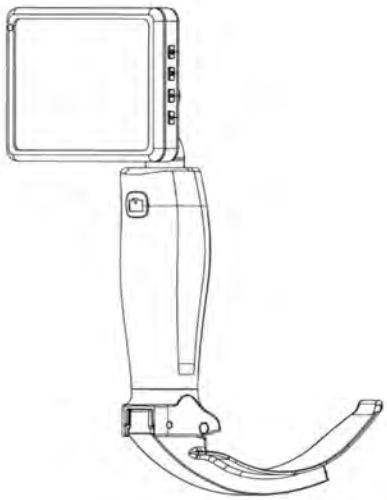

AUG DIGISKOP® Video Laryngoscope adopts state-of-art tech--nique, possesses the advantage of 2.0M Pixels full-view camera, High-resolution monitor, Unique anti fog capability, along with portable ergonomic design, enabling clinicians to improve their chances of first-attempt success while minimizing the injury chances may occur during the intubation process by getting a better view of the glottis structure.

Clinical Advantages: Avoid the injury intubation may cause to the laryngeal structure by getting an optimal view of the laryngeal structure Unique anti-fog capacity, no need to preheat, save time in emergency intubation operation.

FEATURES

- 2.0M Pixels camera, full-view high resolution monitor.
- 3.5" Portatable color display
- Rechargeable lithium-ion battery.
- Various specifications of blades (Newborn/Pediatric/Adult/ Difficult airway intubation Size optional).
- Ergonomic durable design.
- Easy to Operate.
- Utilize 316 medical stainless steel material and blades can be sterilized under high temperature and pressure or through anti-microbial soaking.
- Ultra-big capacity of the battery, can be continually used for 200 minutes.
- Replace routine laryngoscope.
